### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gene Tyler on 9/2/03.

The application has been amended as follows:

In claim 15, line 4, delete "dimethylethyl acrylate,".

2. The following is an examiner's statement of reasons for allowance: Applicants method limiting the claims to the method of claim 11 and those dependent therefrom distinguish over the prior art of the previous office action. Engelhardt (4507440) teaches a crosslinked copolymer which may comprise the same nonquaternized monomers of the present invention used in fracturing with an acidic gel. The differences in Englehardt is that there is no stated molecular weight for the polymer, the teaching in Example 4 uses a ratio outside the scope of the present invention and an acetate form, and the quaternary forms taught use either a methyl chloride or dimethyl sulfate instead of the mineral acid form of the present copolymer (see column 4, lines 20-24). Englehardt thus does not describe the present invention with sufficient specificity to render the present claims obvious to one of ordinary skill in the art.
